

STONE YARD, INC.

ADDITIONAL TABLE & BASE INFORMATION

Material: For most applications, GFRC material is recommended for tables and bases. GFRC will provide significant weight and stability. Fiberstone will weigh approximately 60% less in weight to the same item in GFRC and may be too light in weight for tables. The Syglos material option is available only on select styles and is generally recommended for indoor applications.

Finishes: All Stone Yard finishes are unique and hand applied. Stone Yard takes into consideration the design details, size and texture to create one-of-a-kind beauty and variation throughout the product.

Sealer: All Stone Yard tables & base include a coat of protective polyurethane sealer for UV and moisture protection.

Table Top Attachment: Stone Yard tables & bases can be outfitted with top mounting hardware at additional cost. Installation of top mounting hardware is recommended for all non-glass top applications. Please specify what type of top if not utilizing a Stone Yard top. Stone Yard does not provide glass tops and no mounting hardware is available for Stone Yard bases paired with glass tops.

Overall Height (OAH) of Table: OAH is the sum of the base height and thickness of the table top. Please specify desired OAH when ordering.

Umbrella Holes: Umbrella holes with brass grommet available for tables and bases at additional cost. Please specify hole diameter required (typically 1/4" larger than pole dia.).

Floor Protection: All Stone Yard table bases come standard with cork pads on the bottom.
